

## Alla Alekseeva

She was born in the Zaporizhzhia region.

She became a completely independent creative person a long time ago. She has gone through a long path of doubts, attempts, mistakes, insights and discoveries, everything that makes up creative experience. Alla experiments a lot in painting with active color, texture, and plastic.

Artistic strategy - refers to the cult of color as a philosophy of life. At the same time, a peculiar view can be traced, which lies in the plane of modern art. Explores movement and transformation, plane and space in generalized plastic forms. Such a degree of freedom is characteristic, from which a joyful state of being flows, decorated in a happy combination of form and content.
